**TREATMENT ONLY
AND
TREATMENT ONLY PLUS**

INVESTOR IN PEOPLE

TREATMENT ONLY

We recognise that there are occasions when both parties have identified from existing Medico-Legal Reports that there is some specific medical, or equipment, provision requirement but that a full initial needs assessment or telephone assessment is not necessary.

We have access to an extensive UK wide network of treatment providers including:-

- Physiotherapists
- Counsellors
- Psychologists
- Cognitive Behavioural Therapists (CBT)
- EMDR Specialists (Eye Movement Desensitisation & Reprocessing)

We can arrange for any medical or equipment provision.

Treatment Only is a service where we are instructed to implement a certain type of treatment that has been medically confirmed via a report from a medical professional. These cases will be handled in a slick manner and we will implement the treatment sessions only. We will not provide recommendations on completion of the treatment.

This service also ensures customers have access to the most appropriate rehabilitation service and, where appropriate, will help lower the cost case management however consistent levels of client care is assured and medical recovery will be accelerated.

TREATMENT ONLY PLUS

The additional category of Treatment Only Plus is to cover the cases involving more than one procedure but do not require an initial needs assessment as we will have been provided with medical reports detailing a specific form of procedure. This category should be used for cases that are more complex to organise than straightforward physiotherapy or psychological sessions.

Examples of cases that would fit into this category would be those identified for:-

- surgical procedure
- instructions asking for only the procedure to be carried out
- a steroid/facet joint infection
- some form of treatment requiring a consultant appointment to be arranged

Treatment Only Plus complements our Treatment Only service.

This service will include a lot more support from the Treatment Coordinator/Case Manager to ensure the completion of the recommendations made within the report.
